**LANIER LAUNCHES THE
AC230n DIGITAL IMAGING SYSTEM**

Four-in-One System Increases Productivity for Small Office Environments

West Caldwell, N.J., September 20, 2007 – Lanier today introduced the AC230n digital imaging system. Designed for small offices, the AC230n delivers a wide range of functions that increase productivity and streamline the total cost of ownership for its users.

The AC230n is a multipurpose, network-ready, black-and-white laser printer offering a combination of digital copying, full color scanning, faxing and document distribution features. These capabilities, in addition to a 30 page per minute (ppm) print speed, accelerate document production and provide small businesses with a strong competitive advantage.

Offering full-color TWAIN scanning up to 4800 x 4800 dpi, the AC230n accurately captures documents in 1.4 seconds per page. Users can deliver scanned files via Scan-to-Email, Scan-to-Folder and Scan-to-USB, as well as manage scanned files and access other features remotely by utilizing the SmarThru4 utility. In regard to facsimile transactions, the AC230n transmits documents at three seconds per page scanning and offers users 30 One-Touch Dials and 240 Speed Dials for faster distribution.

The speed of large print jobs is increased by the AC230n due to its 550-sheet paper capacity, 50-Sheet Automatic Document Feeder and the ability to handle a wide variety

of documents up to 8.5" x 14". The device's front-facing USB 2.0 port allows users to print documents from a plugged-in flash drive or save scanned files to a memory stick.

The AC230n is an easy-to-use system, designed with industry standard connectivity to ensure simple network integration and a multi-program control panel that supports 16 languages.

The suggested retail price for the AC230n is \$615. To learn more about Lanier's full line of products, please visit www.lanier.com.

About Lanier Worldwide, Inc.

Lanier's broad line of award winning products helps customers succeed in finding the right document management system to meet their needs, delivering solutions and services that increase efficiency, reduce cost, and improve document workflow.
